

Dear Cardiac Rehab Participant,

Welcome to the VGH Cardiac Rehab Program!

Your program includes:

Weekly in person exercise class with individualized exercise prescription provided by your case manager.

During your exercise session, please listen to your body: take as many rest breaks as necessary, pace yourself, and stop if you don't feel well. Make sure you let your Case Manager know. We are happy to provide you with individual guidance on how to modify or progress your exercise.

Read our newsletter that will be sent out every Monday to stay informed and connected. You can also stay up to date by visiting our program website where you will find info about the program and on demand videos: vghcardiacrehab

In addition to the newsletter, you will receive weekly on demand exercise videos. Feel free to try these routines at home to maintain regular exercise outside of the class.

If you feel you need an appointment with Michele (Dietitian), Gwen (Cardiac Counsellor) or Dr. Shoja (Psychiatrist), please let your Case Manager know.

Cardiac Rehab Cardiologist consultations will only be available for urgent cases, in consultation with your Case Manager.

Instructions for communicating with your Case Manager:

You will be speaking with your case manager during your weekly exercise sessions. If any concerns arise, feel free to communicate this with your case manager. You can also follow up with your case manager via telephone or email.

What we need from you:

If you have any respiratory/flu-like, COVID-like, gastro-intestinal symptoms, or a fever please do not come to class.

If you **DO NOT** wish to continue with the Cardiac Rehab Program, please email your case manager directly. Please note that you will be discharged from our program and will require a new referral to re-enroll. Program fees will be refunded accordingly.
